

CONVEYOR BELT DUST CONTROL SYSTEM

SINGLE-CONE BELT WIPE

AVAILABLE VERSIONS:

- Standard height single-cone
- Low-profile dual-cone
- Custom, ultra-low profile

CUSTOM ULTRA-LOW PROFILE BELT WIPE

FEATURES & ADVANTAGES:

- **Highest rated cleaning effectiveness in the industry of 92%~96%**; while competing technologies are 20%~30% effective
- Urethane cleanerheads are **conformal** to irregular belt surfaces and **deflect away from splices**
- Typically installs in 1/2 day for two millwrights, for common belt widths
- Highly durable, simple, no rotating parts, no electricity or controls/automation required
- Connects easily to existing dust collection aspiration piping, or a local suction system can be utilized
- Eliminates belt turnovers and expensive rotary belt cleaners
- Manufactured in **SSAB Hardox® 500 TUF** for mining, or with **ATEX** urethane for **combustible dust**
- Smooth and cleated belt compatible
- Cleans entire beltline and eliminates buildup on rotating conveyor components
- Ultra-low aspiration volume versus rotary cleaners

ADAPTABILITY:

- Highly customizable
- New or retrofit
- Low airflow requirements
- Easy mounting

DUAL-CONE BELT WIPE
